

FRANCK ANTELME KOUASSI

PhD Student in Applied Statistics & Data Scientist

@ franckantelmekouassi@gmail.com

+33-662-218984

Toulouse, France

FAKouassi

ABOUT ME

At the end of my PhD thesis in applied statistics, my area of expertise is data science, and lifetime and systems reliability modelling.

PROGRAMMING

Python Packages: **Scikit-Learn**, **Pandas**, **Matplotlib**, **Statsmodels**, **Plotly**

R Packages: **Caret**, **mclust**, **Ggplot2**, **Stringr**, **Shiny**

Other Prog. Language: **SQL**, **SAS**

STRENGTHS

Rigorous Dynamic Autonomic

Team-worker Curious

Autonomic analytical capability

LANGUAGES

French: **Native**

English: **Professional**

HOBBY

Sport: **Basketball & Tennis**

Cinema: **Comedy**, **Fantasy**, **Anime**

Music: **Pop**, **Afrobeat**, **Jazz**, **Rumba**

PUBLICATION

Engineering statistical models for carbonation depth |

EXPERIENCE

ATER | INSA-Toulouse

Ongoing

Toulouse, France

- Tutorials and computer labs on lifetime and system reliability
 - Theoretical study of lifetime and reliability models
 - Application of models to real data and results analysis
- Computer labs on Explanatory Data Analysis and Clustering
 - Application of principal component and clustering methods to detect patterns on real dataset

Data Scientist trainee | Université d'Evry

Apr.2019 - Sep.2019

Evry, France

- Identifying factors in student failure by using machine learning:
 - Building and cleaning of students dataset
 - Clustering of students and clusters analysis
- Deployment of proposed model by developing a *Shiny* application

EDUCATION

PHD Student | INSA-Toulouse

Since Oct. 2019

Toulouse, France

- Reliability of Reinforced Concrete Structures and Repairable Systems
- Asymptotic statistics/ Statistical Inference

Master degree in Data Science | Université Paris Saclay

2019

Evry, France

- Machine learning models and statistical modelling
- Python, R & SQL programming

Bachelor degree in Mathematics | Université Nangui Abrogoua

2017

Abidjan, Côte d'Ivoire

TECHNICAL SKILL

Statistical Modelling : **Lifetime**, **Time series**, **Degradation process and Systems reliability modelling**

Explanatory Analysis : **Principal Components**, **Multiple Components and Discriminant analysis**

Machine Learning : **Supervised Analysis & Clustering**
